

INTAKE SYSTEMS FOR VEHICLES LISTED ARE 50 STATE LEGAL. SEE KNFILTERS.COM FOR CARB STATUS ON EACH PART FOR A SPECIFIC VEHICLE.

INSTALLATION INSTRUCTIONS

57-1564
DODGE / CHRYSLER
2011-14 Charger
2011-14 Challenger
2011-14 300
V6-3.6L

TOOLS NEEDED:

- 4mm Allen Wrench
- 10mm Socket
- 14mm Socket
- 10mm Wrench
- Extension
- Ratchet
- Flat Blade Screwdriver

PARTS LIST:

Description	Qty.	Part #
A Hose Clamp #48	1	08601
B Hose; 3.25" ID TO 3.50" ID X 2.25"L, TPRD, BLK	1	084091
C Hose Clamp #52	1	08610
D Grommet; 1"OD, 1/2"ID, 1/2"THK	1	08064
E Intake Tube (II)	1	087251
F Bolt; 8MM -1.25 X 16MM, Hexhead	1	07844
G Washer; 8MM Spring (Wave)	1	08239
H Washer; 8MM, Flat, SS	1	08272
I Bracket; "L," 63-1564, STL, TK/PC	1	083154
J Vent; 90DEG, 1/2" Hose, 1/4" NPT, Black, Plastic	1	08110FK
K Hose; 1/2" ID X 14"L	1	08402
L Hose Clamp #56	2	08620
M Hose; 3-1/2" ID X 3"L Hump Molded	1	084057
N Bolt; M6 X 1.00" X 20MM Hex, SS	1	07795
O Bolt; M6-1.00 X 25MM Buttonhead, SS	1	07729
P Washer; 6MM Flat, SS	2	08269
Q Washer, M6 Split Lock Zinc	3	1-3025
R Washer; 1/4" ID X 5/8" OD -SAE	3	08275
S Bracket, 69-2521, "L," SML, STL, TB/PC	1	070066
T Bolt; M6 X 1.00 X 16MM, Buttonhead, SS	2	07730
U Spacer; .625" OD X .250" ID X .250"L,	1	06555
V Heat Shield	1	074088
W Nut; 6MM Nylock, Hexhead, SS	1	07512
X Edge Trim (20")	1	102494
Y Bolt; 3/8"-16 X 1-1/4"L SS Hex Head Bolt	1	07779
Z Washer; 3/8" Flat Washer, SS	1	08134
AA Edge Trim (15")	1	102474
AB Insert; 3/8-16 X 3/400 X 15/16L, Rubber	1	08163
AC Adapter; Universal, 6" Filter 3.5" Coupler	1	21512-1
AD Hose Clamp # 104	1	08697
AE Air Filter	1	RF-1042

NOTE: FAILURE TO FOLLOW INSTALLATION INSTRUCTIONS AND NOT USING THE PROVIDED HARDWARE MAY DAMAGE THE INTAKE TUBE, THROTTLE BODY AND ENGINE.

TO START:

1. Turn off the ignition and disconnect the negative battery cable.

NOTE: Disconnecting the negative battery cable erases pre-programmed electronic memories. Write down all memory settings before disconnecting the negative battery cable. Some radios will require an anti-theft code to be entered after the battery is reconnected. The anti-theft code is typically supplied with your owner's manual. In the event your vehicles' anti-theft code cannot be recovered, contact an authorized dealership to obtain your vehicles anti-theft code.

2. Lift up and remove the engine cover.

3. Disconnect the inlet air temperature sensor electrical connection.

4. Disconnect the crank case vent hose from the air filter housing.

5. Loosen the hose clamp that secures the intake tube to the throttle body.

6. Remove the bolt that secures the air filter housing to the core support.

7. Remove the complete stock intake system from the vehicle.

NOTE: K&N Engineering, Inc., recommends that customers do not discard factory air intake.

8. Install the inserted nut onto the heat shield using the provided hardware as shown.

9. Install the heat shield mounting bracket (070066) onto the heat shield as shown using the provided hardware and spacer.

10. Install the provided longer edge trim onto the top of the heat shield as shown.

NOTE: trimming of the edge trim will be necessary.

11. Install the provided shorter edge trim onto the bottom of the heat shield as shown.

NOTE: trimming of the edge trim will be necessary.

12. Install the filter adapter into the heat shield and secure with the provided hardware.

13. Install the silicone hump hose (084057) onto the filter adapter and secure with the provided hose clamp.

14. Install the heat shield assembly onto the inner fender; secure the mounting bracket to the factory air box mounting location and secure with the provided hardware. Place the insert nut into the hole in the inner fender and tighten the bolt to secure.

15. Install the provided silicone hose (084091) onto the throttle body and secure with the provided hose clamp.

16. Rotate the inlet air temperature sensor counter clockwise and then remove from the factory intake tube.

NOTE: The inlet air temperature sensor is very fragile.

17. Install the provided grommet and inlet air temperature sensor into the K&N® intake tube as shown.

NOTE: The inlet air temperature sensor is very fragile. Be sure to remove the factory O-ring from the inlet air temperature sensor before installing it into the grommet.

18. Install the 90° NPT fitting into the K&N® intake tube as shown.

NOTE: Plastic NPT fittings are easy to cross thread. Install the vent fitting "hand" tight, then turn it two complete turns with a wrench.

19. Remove the intake plenum mounting grommet from the intake plenum.

20. Install the mounting grommet from the intake plenum into the provided tube bracket as shown.

21. Install the K&N® intake tube into the silicone hump hose and then into the throttle body silicone hose. Install the tube bracket onto the mounting stud and secure it to the K&N® intake tube with the provided hardware. Tighten the hose clamps at this time.

22. Reconnect the inlet air temperature sensor electrical connection.

23. Install the provided silicone hose onto the factory crank case vent tube and then connect the open end to the 90° fitting installed into the K&N® intake tube.

24. Install the K&N® air filter and secure with the provided hose clamp.

25. Reconnect the vehicle's negative battery cable. Double check to make sure everything is tight and properly positioned before starting the vehicle.

26. The C.A.R.B. exemption sticker, (attached), must be visible under the hood so that an emissions inspector can see it when the vehicle is required to be tested for emissions. California requires testing every two years, other states may vary.

27. It will be necessary for all K&N® high flow intake systems to be checked periodically for realignment, clearance and tightening of all connections. Failure to follow the above instructions or proper maintenance may void warranty.

ROAD TESTING:

1. Start the engine with the transmission in neutral or park, and the parking brake engaged. Listen for air leaks or odd noises. For air leaks secure hoses and connections. For odd noises, find cause and repair before proceeding. This kit will function identically to the factory system except for being louder and much more responsive.

2. Test drive the vehicle. Listen for odd noises or rattles and fix as necessary.

3. If road test is fine, you can now enjoy the added power and performance from your kit.

4. K&N Engineering, Inc., requires cleaning the intake system's air filter element every 100,000 miles. When used in dusty or off-road environments, our filters will require cleaning more often. We recommend that you visually inspect your filter once every 25,000 miles to determine if the screen is still visible. When the screen is no longer visible some place on the filter element, it is time to clean it. To clean and re-oil, purchase our filter Recharger® service kit, part number 99-5050 or 99-5000 and follow the easy instructions.
